

Region 3 GPRA Baseline RCRA Corrective Action Facility

Interfacear (Formerly: Quebecor, Alco-Gravure)

**701 Baltimore-Annapolis Blvd
Glen Burnie, MD 21061
Congressional District 2
EPA ID #: MDD030320709
Last Updated 6/13/2005**

Current Progress at the Site

An environmental indicator inspection was performed on September 11, 1998. On December 2000, the property was purchased by AKP Partnership. The Maryland Department of the Environment sent a letter to AKP on January 2000, which stated that no further action is necessary at the site. However, Quebecor is engaged in an ongoing groundwater remediation project pursuant to releases from an underground storage tank.

Site Description

Quebecor Printing is located on a six acre plot at 7364 Baltimore and Annapolis Boulevard in Glen Burnie, Maryland. Quebecor had an on-site industrial wastewater treatment facility. The facility had a State of Maryland Oil Operations Permit for the tank farm and oil storage at the facility. The underground storage tanks at the facility were removed and/or abandoned in place under the direction of the MDE's Oil Control Program.

Site Responsibility

On-going groundwater remediation at this facility is conducted under the direction of the Maryland Department of the Environment.

Contaminants

Ethylbenzene is present in groundwater at concentrations above drinking water maximum contaminant levels. A groundwater remediation system is in place and is effectively treating the plume, and keeping the plume from migrating off-site, according to reports submitted to Maryland.

Institutional Controls

No institutional controls are currently in place.
